TITAN

Titan turnout gear is designed for its functional flexibility and being able to move with convenience throughout the workday. Unique features of the jacket include triple articulated elbows, upper back and underarm expansion pleats, and a lower tapered back hem. Unlike other structural wear, the Titan pant is built with triple articulated knees to provide comfort and protection while crawling on all types of surfaces.

AXIS

Two piece contoured sleeves with built-in underarm bellows for mobility, fit, a full range of arm movement, and limited coat rise. Four panel body with a contoured waist, independent two layer waistband, pleated/darted knees, contoured back yoke and front and back panels shaped at the hips and thighs for unrestricted mobility, fit, expansion and flexibility when climbing, bending, kneeling or crawling.

PATRIOT

Three panel body with a full cut back and two piece contoured sleeves with built-in underarm bellows for mobility, fit, a full range of arm movement, and limited coat rise. With 1.5" fire retardant hook and loop tape, snap, and hook and dee closure provides internal thermal and moisture protection.

RADIUS

Jacket includes a liner inspection opening and an oversized pocket lined with moisture barrier material to keep contents dry. Knees are thermally enhanced with an additional layer of moisture barrier and thermal liner material sewn to the liner. Two fabric take-up straps with postman style buckles shift weight from shoulders to hips and allow for quick, one-handed adjustment

TREX

The entire TREX line is certified to both NFPA 1951 for technical rescue, and NFPA 1977 for wildland fire, making it the ideal PPE for a broad range of applications. With the vast majority of on call firefighter injuries being related to heat stress, keeping your core body temperature down is just as much about safety as it is about comfort. TREX gear helps to keep you cool by providing the protection that you need for most incidents, without the heavy thermal liners found in structural PPE.

BRONX

TL-2 - Traditional Leather

The TL-2 Traditional Leather fire helmet is the lightest NFPA complaint authentic leather helmet on the market. Worn by firefighters worldwide, the TL-2 combines tradition and modern safety in a handcrafted masterpiece. Compliant to current OSHA and NFPA 1971 standards.

The TL-2 Leather is fully NFPA compliant (when ordered with eye protection and earlaps) and can be fully customized. Phenix Technology Inc.'s traditional leather helmet boasts a low center of gravity and is center balanced, thus, promoting a very low degree of neck fatigue. Our traditional leather models interface with any SCBA mask. We offer several options when building your custom TL2.

TC-1 - Traditional Composite

Phenix Technology Inc.'s Traditional Composite helmet boasts a low center of gravity and is center balanced, thus, promoting a very low degree of neck fatigue. Our traditional composite models interface with any SCBA mask. We offer several options when building your custom TC-1. Compliant to current OSHA and NFPA 1971 standards.

Price = \$53/pair

PROTECTION

- 100% Kevlar Palm Side Inner Liner and Flame Resistant Back Side Outer Shell
- Synthetic Leather Palm Shell Reinforced with Tough Flexible Kangaroo Skin Outer Layer
- Kevlar Laminate Reinforcements Back of Fingers
- Padded Knuckle Protection with Reflective Strip
- ANSI Cut Level 3 Protection

MK-1 STRUCTURAL FIREFIGHTING GLOVE

MODEL # 7877

CERTIFIED COMPLIANT TO NFPA 1971, 2018 Edition

Sizes: XS, SM, MED, LG, XL, XXL, XXXL

Price = \$87/pair

PROTECTION

- Unprecedented 5 layers of 100% Kevlar knit for Premium Thermal, Cut & Puncture Resistance
- Cowhide reinforced back shell for long term Radiant Heat Resistance
- NFPA 1971 Compliant Moisture Barrier blocks Chemicals and Bloodborne Pathogens

FIRE **ARMOR**

The First Responder is the complete solution for all emergency responders. The First Responder is designed by EMS / Fire Rescue personnel FOREMS / Fire Rescue personnel. Our vest provides the same level of threat protection as that used by Law Enforcement, but WITHOUT the look of a Law Enforcement vest. It was designed around Bunker / Turnout gear that is worn everyday by Fire-Rescue personnel.

Fire Rescue and EMS personnel can now be seen as a Medical Response versus a Law Enforcement response. This will also eliminate any confusion while working in the warm zones.

- 300 mm (11.8") Spreading Distance
- Replaceable Cutting Edge Inserts
- No Trailing Hoses/Cables
- Hydraulic Operation
- Battery-Powered
- Real Portability
- No Setup Time
- No Gasoline

The **Handy Rescue System** allows you to select the right tool for the job at the work site and while working. The cutters, spreader, door openers and mini ram are all interchangeable, and can be quickly and safely exchanged using our unique coupling system. Note: The HRS-946 can only be used with the HRS-941DF Pump-unit. The robust quick-change coupling system holds the Head-units to be securely attached on the Pump-unit and allows the appropriate Head-unit to be selected and exchanged on site as required.

Entry packages starting at **under \$5000!**

PROSPAN™

Designed primarily for stabilizing motor vehicles involved in crashes, our Telescoping Aluminum Support System (TASS) is a patented, 3-tiered, extendable product.

Like all Prospan items, the TASS has been designed to be simple to use and incredibly strong. Independent testing by the University of Illinois, shows the TASS to be one of the strongest vehicle stabilization products in the world. Maximum allowable load-fully extended is 7000 lbs.

- 3-Tiered, Telescoping Aluminum Pistons
- Knurled, Easy-Grab Collars
- Tethered Detent Ball Pins
- Anodized Finish
- Durable Design
- Simple to Maintain
- Short = 26-48" Span
- Long = 43-102" Span

**Complete Set of 4
Struts for \$4500**

T&J RESCUE ENTERPRISES LLC

The TL-9 Stabilizer allows for a rapid lift with maximum stabilization

- Constructed with ½ inch AS-36 Steel
- Compression tested to 50 tons
- Works with all hydraulic spreader units
- Custom made to fit your spreader within an 1/8 of an inch
- Rapid set-up and operational time, user friendly, extremely efficient, safe and simple to operate
- Solid construction features provide for unparalleled lateral stability when compared to any other set up of this nature

The TL-9 Stabilizer was designed by firefighters for firefighters! It allows you to perform a lift with your hydraulic spreader in a quick, efficient, and stable manner.

ZMAG

Rescue

GROUND PADS: The power of the triangle is the secret behind all strut systems. We didn't invent the triangle, just an easier, faster, safer way to build one. (2 Come in Kit)

COUPLINGS : No need to carry extra long 4x4's. With the ZMAG© Couplings you can easily turn 2 shorts into 1 long. We suggest the use of a wedge in the top side of the coupling to "snug" the system.

ZAMA POINT : Simply place it over the end of your 4 x 4 and attack any plastic, or sheet metal edge. The point has two slightly different angles. Using the point will allow you to "Bite" into many angles and body parts. With each side cut just slightly different you are sure to find a good seating for the top of your strut.

ZMAG Vehicle Stabilization Strut Kit

Kit Includes: ZMAG Ground Pads: Kit Includes 2 Base pads , 2 top points, and the 1 in. straps that go with ratchet on base pads. 4x4 lumber is NOT included. ZMAG Ground Pads: Kit Includes 2 Base pads , 2 top points, and the 1 in. straps that go with ratchet on base pads. 4x4 lumber is NOT included.

EXTENDOBED

If you've been looking for a faster, simpler way to transport and quickly access fire equipment when you need it, you've found the right company. Our firefighter slide out drawers for truck beds allow you to keep multiple heavy and large items in your team's vehicles and use them at a moment's notice. Instead of fumbling through a pile of objects when a particular tool is most needed, simply pull out the sliding tray and locate it instantly. Our fire-related slide out drawers for truck beds aren't limited to professional firefighters, either. They work excellent for trucks and vans operated by first responders, rescue teams, fire investigation crews, and related professional teams.

FLIR K1

The FLIR K1 is a rugged, compact thermal camera that serves as an extra set of eyes on the fire scene, allowing commanders, officers, and inspectors to quickly complete a thorough 360° assessment in total darkness and through smoke. With a bright, integrated flashlight, the FLIR K1 illuminates the scene to help the user steer and manage the crew more effectively. It also displays 160 × 120 pixel thermal images that help users gain additional situation awareness that is not possible with the naked eye

FLIR K33

FLIR now gives you a low-cost, easy-to-use option that doesn't sacrifice the reliable clarity and performance you need — the FLIR K33. This TIC features FSX™ Flexible Scene Enhancement, which intensifies structural and textural details in thermal images. The enhanced perspective and orientation helps improve situational awareness and give firefighters a greater sense of confidence and safety.

The FLIR K33 can be purchased with an in-truck charger for an additional \$725

FLIR K2

FLIR is on a mission to make high quality thermal imaging cameras standard issue equipment for every member of a fire crew. The FLIR K2 makes that possible by providing capability, ruggedness, and reliability at an affordable price. With features such as Multi-Spectral Dynamic Imaging (MSX®), easy-to-use buttons, and operability in temperatures up to 500°F, the K2 is a small investment that pays big dividends—saving lives, protecting property, and ensuring firefighter safety.

POWER HAWK **TECHNOLOGIES, INC.**

The Power Pusher® Ram System is a patented multi-purpose spreading and load-holding tool system that is used for vehicle extrication, collapse, stabilization, damage control, and other operations.

Power Pusher's operate using the spreading power from any spreader rescue tool that can fit into the Power Pushers patented slot & push-plate configuration. The Power Pusher Ram system may also be operated manually as stand-alone items for stabilizing and load-holding operations.

BullDog
HOSE COMPANY

Hi-Combat II

Hi-Combat II® leverages the latest firefighting hose technology to power aggressive interior combat operation. Its unique double-jacket hose design gives combat firefighters the performance, flexibility, and endurance to face the toughest challenges. A special weave, high-tech nylon-polyester outer jacket encases an inner lining consisting of a one-piece, extruded-through-the-weave hose for optimum performance and reliability.

With high-visibility material woven right into the hose, firefighters can follow the 'exit' and arrow markings to safety. BullDog can also add up to 32 custom characters sewn into the hose.* Hi-Combat II hoses are available in five NFPA colors extruded through the weave, not dyed, and will not bleed or wear off. This firefighting hose combines high resistance to heat, abrasion, and chemicals with unmatched kink resistance and superior ease of drag.

Engineered by BullDog, Hi-Combat II is guaranteed to meet specified burst pressure and exceed the NFPA 1961 standard. Hi-Combat II's super powerful attributes set standards for fire hose that every firefighter deserves.

HI-COMBAT II® SPECIFICATIONS:

Size	Pressure						Bowl Size	Weight (50'/15M)	Coil Diameter (100'/30M)
	Service		Proof		Burst				
inch mm	psi kpa	psi kpa	psi kpa	psi kpa	inch	lbs kg	inch mm		
1-3/4 45	500 3500	1000 7000	1500 10500	2-1/8	18 8.1	16.5 419			
2 50	500 3500	1000 7000	1500 10500	2-3/8	20 9.07	17.5 445			
2-1/2 65	500 3500	1000 7000	1500 10500	2-7/8	23 10.4	18.5 470			

BullDog's exclusive heavy-rib outer cover combines with a unique nitrile-PVC rubber, through-the-weave construction to provide the backbone of excellent hose performance in Red Chief® and Yellow Chief®. The heavy-rib construction protects your water supply with a high resistance to cuts, punctures and abrasion. Compact and kink resistant, lightweight and easily maneuverable, Red Chief and Yellow Chief are ideally suited to meet the specifications and tough demands of most municipal fire departments. With a proof pressure of 600 PSI (4200 kPa) and a tolerance for heat and cold, these hoses maintain peak performance in any season or environment, withstanding temperatures from -36° F to 158° F (-36° C to 80° C).

Red Chief/Yellow Chief hose is virtually maintenance free and requires no drying after use. With these powerful hoses, you save time and money, since less backup hose is needed. Red Chief and Yellow Chief are in a class by themselves — clearly superior to traditional attack lines and compliant to the NFPA 1961 standard.

RED/YELLOW CHIEF® SPECIFICATIONS:

4-Place Setup

This unit will dry up to four sets of turnout gear. Both the 2- and 4-place setups are designed to go with a truck crew. Like the 2-place setup, the 4-place setup operates on standard 110 volt electrical outlets so there is no need for extra high-voltage outlets, and it's on sturdy heavy-duty wheels, so when it is out of service you can remove the dryer attachments and move it to a different location to save space.

4 Place = \$9500

2 Place = \$7500
